

Feedback Form

As you leave the ASAP Program please describe the quality of your experience at ASAP:

Client: ASAP helped me greatly. At first I didn't think it was going to work but I was proven wrong. It was all around a ~~very~~ good experience.

Parent: We weren't sure if the asap program would change our son's drug use. We strongly believed that he couldn't quit using just by us forcing him into treatment. We are pleasantly surprised by the outcome! asap was life changing for ~~him~~ but also for us. The Family night experiences have helped us grow individually and as a family. We will take the tools that we've received and our lives and relationships with others will benefit. Thank You for guiding our family down a path that has allowed healing and, hopefully soon, wholeness.
