As you leave the ASAP Program please describe the quality of your experience at ASAP:

Client: I would have to say that ASAP has changed me for the better. My family and I have greatly improved in relationships and arguing. If it were not for ASAP I'm afraid that nothing would have been changed at all in my family. I loved everyone at ASAP because they were not only funny but they were serious when it came to the things that needed to be dealt with.

Parent: This program was life changing. It offered a safe environment to tell the truth and help all involved to see what they needed to do so our son would stop using drugs. ASAP helped us see our son's drug use was a family issue and for this I will be forever grateful. I feel we now have the tools to move forward and help our son live a sober life.
