

Feedback Form

As you leave the ASAP Program please describe the quality of your experience at ASAP:

Client: Asap helped my parents understand
substance use more and helped improve my
family relationship. It turned my mindset
of use totally around and I don't know
what I would have done w/out it.

Parent: I found the program very effective and
helpful. Seeing other families and hearing their
story, learning about all the subjects we
have covered, all of it combines to be useful.
I think the Dr. has a great way of handling
the parents and the kids. I do believe that
the entire staff care and give every effort.
